

# How to PLAY LONDON to PARIS

① Draw 2 long parallel lines with chalk, about 3ft apart. Draw lines across about 18" apart so the grid becomes a track

② First space is London, the other end is Paris - Each player throws a stone as far up the track as possible. The stone must land inside a grid space without touching any lines.

③ The Player can then move the stone BUT the only way is to hop, tapping the stone along with the foot they are hopping on

④ The player must stop as soon as their stone goes outside the parallel lines, stops on a line or they put their foot down & the next person goes  
FIRST TO PARIS WINS!
